Skills

- **Languages:** C++, JavaScript, C, PHP, Kotlin, Python, Java
- **Frameworks:** HTML, CSS, NodeJS, ReactJS, Angular, Tailwind, Bootstrap
- **Tools/Platforms:** MySQL, MongoDB, Android Studio, Postman, Figma, Git, Github
- **Soft Skills:** Problem-Solving, Time Management, Adaptability

Projects

GrannyRecipe - Food Recipe App | GitHub: *October 2025 - Ongoing*

- Developing a full-stack food recipe application that helps users discover, save, and organize homemade recipes through an intuitive and visually appealing interface.
- Built with modern web technologies, featuring recipe search and filtering, responsive UI design, and secure user authentication for personalized recipe management and favorites.
- Delivering a smooth, engaging, and scalable platform that enables users to explore new dishes, preserve family recipes, and manage their cooking experience efficiently across devices.

  TechStack: Kotlin, Java, XML, Api

FraudShield - An AI-powered fraud detection assistant | Github | Live *December 2024*

- Developed an AI-powered fraud detection assistant that helps identify suspicious transactions and patterns in real time, improving security and reducing financial risk for users and organizations.
- Built with machine learning models for anomaly detection, an interactive dashboard for monitoring alerts, and a secure backend to process and analyze transactional data efficiently.
- Delivered a reliable and scalable solution that enhances fraud prevention, minimizes false positives, and enables faster decision-making through automated insights and explainable alerts.

  TechStack: HTML, Javascript, Python, Tailwind

Certificates

- Project on Git - Infosys Springboard **| Link** *Jul 2025*
- Human Computer Interaction - Nptel **| Link** *May 2025*
- Google IT Automation with Python - Coursera **| Link** *Nov 2024*
- Foundation C# with Microsoft - FreeCodeCamp **| Link** *Nov2023*

Achievements

- Earned a Silver Badge on HackerRank with a 3-star rating in C++, demonstrating consistent coding performance. *Oct 2025*
- Solved 150+ coding problems across LeetCode, GFG, and HackerRank, strengthening data structures and problem solving skils. *Aug 2025*
- Achieved 5 badges and Level 12 on Android Studio by completing core modules in Android app development. *Jan 2025*

Education

- **Lovely Professional University** *Phagwara, Punjab*
  Bachelor of Technology - Computer Science and Engineering; CGPA: 7.04 *August 2023 - present*
- **Bal Mandir Senior Secondary School** *Haridwar, Uttarakhand*
  Intermediate; Percentage: 65 *April 2022 - March 2023*
- **Bal Mandir Senior Secondary School** *Haridwar, Uttarakhand*
  Matriculation; Percentage: 75 *April 2020 - March 2021*
